

We haven't forgotten you. We just found our navigation charts. We are checking to see if there is a more recent update since the ones we have are 1993 and use a preliminary NAD 27 datum which does not correspond to any GPS datum. We doubt if it has been updated, but if so will get a new chart . We will mark the stations on the map we end up with and send you a copy this week end.

Steve and Karen
